**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 6 and 9 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Ackermann, 2986787, in view of Kurihara, 3801726.

Regarding claims 1-3, 6, 9, Ackermann discloses a wire bundle, i.e., two ends 1, 2 of the single wire is considered a wire bundle, comprising a plurality of sinuous wires (3, 4, figure 1) each in a form of a sine wave arranged adjacently in coextensive side abutting relation and a clip (figure 3) with inwardly protruding hooks on the end of the legs of the u-shaped clip for clamping the wire bundle together. The clip is not a single continuous piece of wire.

Kurihara discloses a bundle of coextensive abutting sinuous wires (2) clamped together with a clip device (3) being formed from a single continuous piece of wire having a generally u-shaped configuration with an open and closed end. The clip also has legs that extend arcuately away from the base portion toward the open end (figure 2c).

In view of Ackermann and Kurihara's teachings, it would have be obvious to a person having ordinary skill in the art to manufacture the clip in Ackermann

from a single continuous wire in order to simplify the process and reduce the cost of manufacturing the clip.

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
